# Monthly report: one-page checklist

For small businesses and property managers. Do steps 1 to 5 before the next month ends.

## Before next month's report

- [ ] **Time your next report.** Write down how long it takes from first export to final send.
- [ ] **List your sources.** Every place a number comes from.
- [ ] **Make one fixed template.** Use the five parts below.
- [ ] **Pick a send date.** For example, the 5th of every month.
- [ ] **Write down your checks.** What would make you stop and look twice? A missing payment? An expense over a set amount?

## The five parts of a short report

1. **Money in.** Collected compared with expected
2. **Money out.** Major expenses, with anything unusual called out
3. **Open items.** Late payments, open repairs, unpaid invoices
4. **Coming next month.** Renewals, planned work, known costs
5. **A 3-sentence summary.** What went well, what needs attention, what you recommend

## Always stays with a person

- Reviewing every report before it is sent
- Explaining a bad month or an unexpected cost
- Any recommendation involving money, such as raising rent or approving a large repair
- Answering follow-up questions from owners or partners

## Before you choose a tool or a helper

- [ ] Do my numbers mostly live in one system, or several?
- [ ] Who will fix the report when an export changes?
- [ ] What does the full monthly price include, and is there a setup fee?
- [ ] What do I keep if I stop?
